DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) filed 7/10/2003 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Only the initialed references of the IDS have been considered. All remaining listings of a foreign patent, a patent abstract, or non-patent literature have been crossed out because copies of the same have not been provided.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 have been rejected under 35 U.S.C. 102(b) as being anticipated by JP (60-060098).

JP ('098) shows a cowling assembly comprising an upper motor cover [20b] (figure 1) mating with a lower motor cover, each having an exterior surface, and a latch handle [42] mounted on the lower motor cover. A raised shoulder [22a] is positioned adjacent to the latch handle to protrude outwardly from the exterior cowling surface [20a] (see figure 5) to surround the latch handle, and has a flat, level support surface that forms a support surface for the

cowling assembly. The raised shoulder has a generally pentagonal shape in cross section (see fig. 3).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Isogawa et al., Hiraoka, Dunham et al., Kobayashi et al., Boda et al. (fig. 4), Crane et al., Kiekhaefer, JP ('592), JP (891), JP (992), and JP (894) show latch handles at least partially surrounded by raised shoulders, each reference anticipating at least claim 1.
